PROFESSIONAL SUMMARY

Recent computer science graduate specializing in artificial intelligence and machine learning, with practical experience in software engineering, full-stack web development, and building machine learning models. Proficient in Python, Java, Django, TensorFlow, and cloud platforms. Demonstrated ability to deliver real-world solutions through internships and academic projects. Eager to make a meaningful contribution to forward-thinking teams in the tech industry.

EDUCATION

- **B.Tech (CSE- AI & ML)** – Rise Krishna Sai Prakasam Group of Institutions, Ongole | 2021 – 2025 | CGPA: 8.86
- **Senior Secondary Education (MPC)** – Sri Saraswathi Junior College, Ongole | 2018 – 2020 | GPA: 9.94
- **Secondary Education** – Apex High School, Ongole | 2017 – 2018 | GPA: 10.0

TECHNICAL SKILLS

Programming Languages: Python, Java, C

- **Web Development**: HTML, CSS, JavaScript, Django
- **Databases & Tools:** SQL, Git/GitHub, Power BI, VS Code, Google Colab, Cloud (AWS, Google)
- **AI/ML**: ML Algorithms, Deep Learning, NLP, Generative AI, Prompt Engineering
- **Core Concepts**: Data Structures & Algorithms (DSA)

EXPERIENCE

Blue Yonder Consultant – Trivora Tech Consulting Pvt Ltd| Remote | May25 – Till Now

- Built UDT and UDP customisations to meet business requirements not covered by the standard BY application.
- Delivered enhancements from business requirements within agreed timelines.
- Wrote and ran SQL queries and PL/SQL scripts for data analysis and issue resolution.
- Monitored Control-M batches, resolved batch alerts and incidents, and kept the system ready for business users.
- Analysed BY server log files to identify root causes of issues.
- Created BY JDA UI objects including FE pages and search.
- Resolved incidents and service requests in ServiceNow on time.
- Provisioned access to JDA SCPO for business and extended users.

PROJECTS

Autonomous Cognitive Engine (ACE) [GitHub]–

- Developed a multi-agent system using LangGraph and Llama 3.2 that breaks down complex research goals into executable search queries and document analysis tasks.
- Built a Hybrid Memory (RAG) system using FAISS and Sentence-Transformers to allow the agent to retrieve information from uploaded PDFs alongside real-time web results.
- Implemented a Human-in-the-Loop (HITL) gate using Gradio, ensuring the agent pauses for user approval of its research plan before executing and generating a final PDF report.

Phishing URL Detection (ML + Django) [Live Demo] –

- Served as the Team Lead for this final-year college project, managing a team of four and overseeing the integration of machine learning models into a functional web application.
- Built the entire full-stack Django application and designed a responsive frontend using HTML, CSS, and JavaScript to allow users to scan URLs for threats in real-time.
- Achieved 80% detection accuracy by training models on a dataset of 5,000+ URLs, utilizing XAMPP for local server management and database testing.

My Super Fun Weather App (Frontend/API) [Live Demo]–

- Built a dynamic web app during my Edunet Foundation internship that uses the OpenWeatherMap API to give users instant weather reports for any city.
- Added a location-based feature that automatically detects where a user is and a dynamic UI that changes the background theme to match the current weather outside.
- Handled the entire frontend design using HTML5, CSS3, and JavaScript, making sure the layout is responsive and looks great on both phones and laptops.

CERTIFICATIONS

AI and ML

- Artificial Intelligence Foundation | Artificial Intelligence Primer Certification (Infosys Springboard)
- Artificial Intelligence Fundamentals | Data Science Foundations Level 1 (IBM SkillsBuild)
- Machine Learning Specialization (Stanford University & DeepLearning.AI) (Coursera)
- The Joy of Computing Using Python (NPTEL, IIT Madras)

Cloud & Data Analytics

- Get started with Power BI | Model Data with Power BI (Microsoft Learn)
- AWS Academy Graduate - Cloud Foundations | AWS Academy Graduate - Data Engineering (AWS)
- Deloitte Data Analytics Virtual Experience Program | Tata Data Visualization Virtual Experience Program (Forage)
- Generative AI
- Introduction to Generative AI (Microsoft Learn)
- Gen AI Academy (Google Cloud & Hack2Skill)
- **Web Development**
- Web Development Fundamentals (IBM SkillsBuild)
- **LANGUAGES**

English (Professional) | Hindi (Native) | Telugu (Fluent)

ACHIEVEMENTS & ACTIVITIES

- **Competitions:** 1st Place – Poster Presentation (Intraspecific) **| Participant** –Technical Quiz (Interspecific)
- **Workshops:** SQL Bootcamp (LetsUpgrade)| AI Tools (Be10x, Freedom With AI)| Excel with AI Tools (Tech Gurukul)| Full Stack Hackathon (Brainovision)
